WORK FROM ANYWHERE WITH TRIDENT & ARUBA

Ensuring uninterrupted connectivity and availability through secure networking infrastructure and services.

SURVEYING WORK'S NEW NORMAL

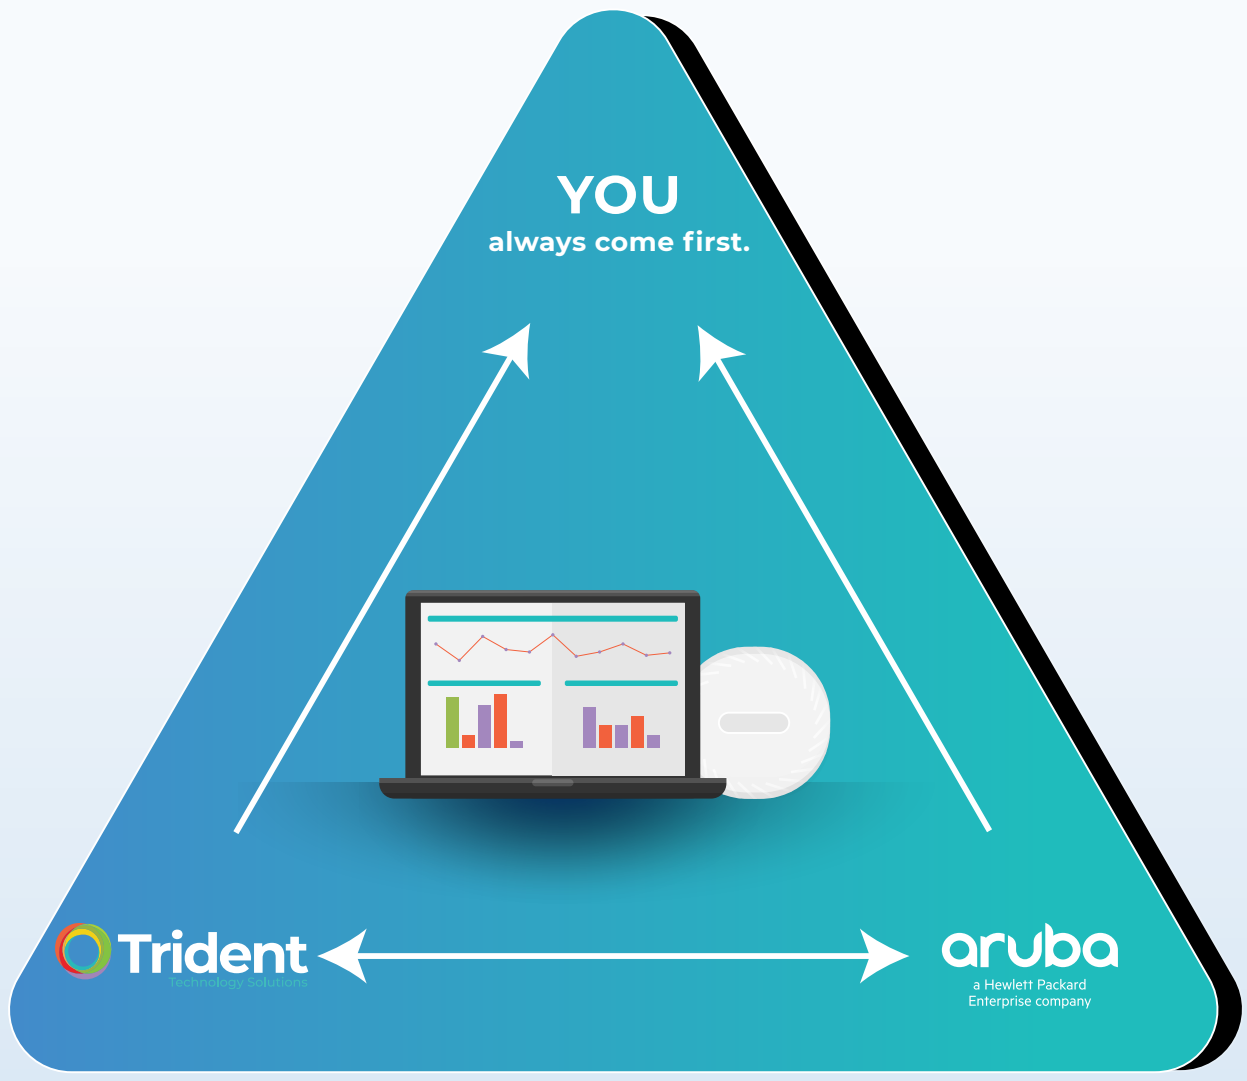
The workplace might never look the same, and for IT teams, the shift to a hybrid workforce presents a number of critical networking challenges.

Delivering an in-office experience at home	Applying consistent security controls across many disparate locations	New solutions rarely work right out of the box	Lack of visibility across distributed network users	Home networking architecture increases help-desk calls

These challenges need not cause unnecessary headaches.
At Trident we specialise in designing and delivering tailored Aruba solutions for our customers that **improve the end user experience while lowering network risks.**

The skillsets and experience of our engineers ensure your solution is **implemented faster and works from day one.**

YOUR NETWORKING TRIANGLE



DELIVERING ON YOUR NETWORK NEEDS

Trident is a leading Australian IT company and part of the Spirit Technology Solutions group. We have helped design, deploy, monitor and manage clients' cloud-based networks, around the clock, for over 35 years and offer both a range of consulting services and end-to-end network solutions.

Infrastructure	Management	24/7 Monitoring	Communications

As an Aruba Gold partner, we have deep industry expertise and use a highly consultative approach to designing and deploying network solutions that are tailored specifically to each facility's unique needs.

Trident's Aruba Technical Certifications

ACMA	ACMP	ACSA	ACSP	ACCP
